

# ANHELINA BONDARENKO

Full-Stack Developer · UI/UX · Machine Learning

angelibond16@gmail.com · +905337924610 · Gebze, Türkiye · GitHub · LinkedIn

Recent Computer Science & Engineering graduate (Gebze Technical University, Jun 2026, GPA 3.0) with hands-on experience spanning desktop applications, computer vision, and full-stack web development. Built and deployed production-ready systems during an internship at Intetra and through independent research projects combining machine learning with real-world applications. Passionate about robust, efficient, and user-friendly software.

## WORK EXPERIENCE

### Software Engineering Intern | YUCHISOFT

*Yuchisoft – Gebze, Türkiye* *Jun 2026 – Jul 2026*

- Architected and developed a robust "Document Management System" (DMS) using .NET 8 and ASP.NET Core MVC, following a 3-Tier Architecture (Presentation, Business, Data) to ensure clean separation of concerns.
- Implemented Data Access Layer using Entity Framework Core with SQL Server, utilizing the Repository and Unit of Work patterns to decouple logic and improve testability.
- Engineered a granular security model with ASP.NET Core Identity, incorporating Role-Based Access Control (RBAC) and Global Query Filters for secure "Soft Delete" data lifecycle management.
- Developed asynchronous file management features, enabling multi-file uploads and secure previews from external physical storage using AJAX, jQuery, and PhysicalFileResult.
- Optimized system reliability by implementing Global Exception Handling, Activity Logging for audit trails, and comprehensive API documentation with Swagger (OpenAPI).

### Full-Stack & Desktop Application Developer Intern

*Jul 2025 – Aug 2025*

*Intetra – Gebze, Türkiye*

- Architected backend using MVC pattern with PostgreSQL for managing user and device data.
- Built multi-threaded hardware controller (PyQt5 QThread + esptool.py) for real-time non-blocking firmware flashing, erasing, and verification.
- Engineered cloud firmware management via Microsoft Graph API (OAuth 2.0 device code flow) and OneDrive integration.
- Delivered bilingual (i18n) operator/admin GUI with PyQt5 and Qt Designer within a two-month internship.

### Front-End Developer & UI Designer

*Sep 2024-Jan2025*

*EKO Innovation & Trading S.L. – Remote*

- Collaborated closely with backend developers to integrate ASP.NET Web API, translating technical requirements into a seamless user experience without friction between teams.
- Took ownership of the UI component library, ensuring consistent design language across the platform — balancing aesthetic decisions independently while aligning with stakeholder expectations.
- Maintained clear communication across a cross-functional team to deliver responsive, accessible UI features on schedule.
- Adapted quickly to an unfamiliar codebase and design system, contributing meaningfully from early in the engagement.

## EDUCATION

### B.Sc. Computer Science & Engineering

*Sep 2022 – Jun 2026*

*Gebze Technical University*

- GPA 3.16 · Coursework: Computer Graphics, Machine Learning, Databases, OOP, Algorithms
- Worked in multinational teams; independent projects in CV/ML, graphics, and full-stack web.

### B.Sc. Information Marketing, Advertising & PR

*Sep 2020 – Jun 2024*

*Kharkiv National University*

- Marketing research, data visualisation, SEO optimisation, and social media strategy.

## PROJECTS

**Crochet Pattern Detector** | *Python · YOLO-Pose · PyTorch Geometric · FastAPI · React Native*

Automated crochet stitch detection, GNN-based pattern reconstruction, and 3D chart rendering.

- Collaborated in a two-person team, dividing responsibilities across data annotation, model development, and UI/backend design — required constant alignment and mutual accountability to keep the pipeline coherent end-to-end.
- Took initiative on ambiguous problems (stitch topology inference, SVG rendering distortion) where no existing solution present, iterating independently until the output matched real crochet chart conventions.
- Balanced research exploration with delivery pressure, shipping a working demo for a university graduation deadline.

**LogiTrack Pro** | *Next.js 15 · TypeScript · SQL Server · Prisma ORM · NextAuth.js · Tailwind CSS*

Full-stack logistics management system built to advanced database course requirements.

- Designed complex relational schema in SQL Server with Prisma ORM; implemented NextAuth.js authentication.
- Built responsive SPA with Next.js 15 App Router and Tailwind CSS.

**Image Filter Generator** | *Python · Jupyter · Deep Learning*

Supervised regression model for reverse-engineering image filters automatically.

- Worked through the problem independently, testing three distinct approaches (CycleGAN, U-Net, regression) before settling on the most effective solution — demonstrating persistence and structured thinking under uncertainty.
- Self-directed throughout: defined the problem scope, reviewed relevant literature, and made all technical trade-offs without external guidance.

## Sertificates

### Introduction to Artificial Intelligence with Python (Certificate)

*Jun 2024 – Sep 2024*

*Harvard University (CS50 AI)*

## SKILLS

| | |
|---|---|
| **Languages** | Python, C, C++, Java, TypeScript, JavaScript, SQL, C#, Razor |
| **ML / CV** | YOLO-Pose, PyTorch Geometric (GAT/GNN), scikit-learn, NumPy, OpenCV, Jupyter/Colab |
| **Graphics** | OpenGL, GLSL, Ray Tracing, Shadow Mapping, FBO, Phong Shading |
| **Web / API** | React.js, React Native, Next.js 15, FastAPI, Node.js, ASP.NET Web API, HTML5/CSS/SCSS |
| **Databases** | PostgreSQL, SQL Server, Prisma ORM, Data Modelling |
| **Desktop** | PyQt5, Multi-threading, Async Programming, Qt Designer, esptool.py |
| **Tools** | Git, Docker, npm, Figma, CVAT, Agile / Scrum |
| **Human Lang.** | Ukrainian (native), Russian (native), English (C1), Turkish (B2) |
